

Business

OVERVIEW

THE INTELLIGENT PARTNER FOR ALL MANUFACTURING NEEDS

For more than 70 years, we have been taking our clients' intelligent ideas that make our world better for consumers, industry, and businesses, and applying our in-depth engineering, manufacturing and innovation intelligence to drive better and faster results.

Our intelligent approach to manufacturing embraces a multi-disciplinary approach to product design, manufacturing processes, and custom automation for even the most intricate procedures. Because of the diverse and proven human experience we bring to each team, we are able to develop innovative methods that rise above traditional means and drive unprecedented results which include:

- Reduced cycle time
- Lowered operating costs
- Higher profitability margins
- Accelerated time to market savings weeks not days

The Difference We Deliver

We hire proven industrial engineers with vertical expertise aligned with our core competencies:

- Medical Device / Life Sciences
- Aerospace
- CPG / Food and Beverage
- Industrial/Automotive, Assembly, Testing

Because we have engineers and project managers that are experts in specific categories, we are able to provide insights and highly relevant solutions to design challenges our clients face, troubleshoot procedural complications, and develop the right machinery, assembly, and robotics quickly. This collaborative approach across disciplines and scientific expertise alone enables us to be the kind of partner that truly helps clients exceed timeline and cost goals associated with complex manufacturing projects.

In many cases, it is this "round-table" approach to scientific problem solving that has enabled us to produce products with the kind of accuracy and precision clients thought were impossible. Our services include:

- Custom Automation
- Robotics
- Build to Print Production
- Machine Vision
- Precision Part Handling
- Assembly
- Testing
- Inspection and much more

How We Exceed Expectations

Our team understands the business not just the production challenges our clients must overcome. We know how critical it is for our clients to get to market quickly, launch with sustainable price points, and deliver products to consumers and businesses alike that are highly accurate and effective. Not only do we assign proven engineers and managers to client projects, we call on the proven business experience and outcomes of our leadership team. For example, our leadership team has helped clients increase revenues and profit margins, and generate substantial backlog bookings in just months.

Our cross-discipline teams assigned to client projects include our business and engineering experts, truly setting us apart from many manufacturing firms that just apply automation or robotics staff. Additionally, we have our own in-house 15,000 sf machine shop that enables us to produce the parts we need as needed, assuring we can keep projects moving forward on time, on budget, and on profit.

Global Presence and Recognition

With approximately 100 employees across all functions and expertise, MiQ serves clients around the globe from two strategically located manufacturing plants in Cincinnati and Carlsbad, totally nearly 150,000 square feet.

Certifications we hold include:

- NADCAP Non-conventional Machining Certificate
- AS9100D Certificate
- ISO 9001:2015 Certificate
- ISO 13485:2016 Certificate
